ROYAL MINT GARDENS
LONDON

Dear Customers, Kind greetings.

We are now peaking at almost 400 contractors on site each day, the big push to completion is well underway with teams of installers fitting the remaining kitchens, bathrooms and flooring. The workforce is split allowing the decorators to work late into the evenings. Blocks B and C will complete in November and Block D will follow shortly thereafter. Please make sure you have all your finances in place. Contractually we will serve you with 10 days' notice advising you of completion. If you need any assistance whatsoever, do not hesitate to contact either Amy or Shasha – they can assist with all matters including furniture packs and window blinds.

Sample Kitchen

Now that the temporary hoists have been removed from the western elevation, the remaining cladding panels have been installed and the building is fully clad. The lower level scaffolding is being dismantled, exposing the brick elevation to the front and side of the building. Deliveries for the landscapers are arriving on a daily basis and teams of operatives are gradually transforming the communal areas. Most of the Corten weathered steel planters, irrigation systems and decking products have been installed. We have now ordered the gym equipment and all the furniture for the communal areas.

All of our photovoltaic panels are now in place and producing green energy, all plant including underfloor heating and fan coiled cooling units are being commissioned.

IJM Land UK have now moved into a new office, directly opposite the end block of Royal Mint Gardens, 14 Royal Mint Place. All visitors are welcome.

Kind regards, PP

Edward Chong

Director
